

IG4 Capital Closes New Private Equity Fund for Latin America and Creates New Infrastructure Investment Platform to Invest in the Andean Region

IG4 Capital has secured US\$231.5 million (approximately R\$ 1.2 billion) in commitments for the final close of its new UK based Private Equity Fund II focused on special opportunities in Latin America. In total, IG4 Capital has accumulated approximately US\$500 million in assets under management between Private Equity Fund I (which controls Iguá Saneamento S.A., one of the largest private water and sanitation companies in Brazil) and the new Private Equity Fund II. IG4 has also raised additional co-investment commitments for the recently created IG4 Capital Infrastructure Investments platform in the UK that will target infrastructure and logistics assets in the Andean Region. The new infrastructure platform to invest in the Andean Region will continue pursuing capital raising alternatives following the same value oriented and special opportunities investment strategy employed by Private Equity Funds I and II.
