Readership: This document is intended solely for the addressee(s). Its content may be legally privileged and/or confidential.

Opinions: Any opinions expressed in this document may be subject to change without notice. We are not soliciting or recommending any action based on this material.

Risk Warning: Past performance is not indicative of future results. Our investment management services relate to a variety of investments, each of which can fluctuate in value. The value of portfolios we manage may fall as well as rise, and the investor may not get back the full amount originally invested. The investment risks vary between different types of instruments. For example, for investments involving exposure to a currency other than that in which the portfolio is denominated, changes in the rate of exchange may cause the value of investments, and consequently the value of the portfolio, to go up or down. In the case of a higher volatility portfolio the loss on realization or cancellation may be very high (including total loss of investment), as the value of such an investment may fall suddenly and substantially.

In making an investment decision, prospective investors must rely on their own examination of the merits and risks involved.
